

Riverbend Orchards is a family-owned business located on the outskirts of Portage la Prairie, Manitoba. Our 20 acre orchard includes production of saskatoon berry, haskap, tart cherry, aronia, gooseberry and fruit trees such as apple and plum.

We have developed an efficient system for the propagation of small fruit plants. Haskap and aronia are propagated by collecting cuttings from young plants growing in our fields. Rooting of cuttings is done under greenhouse mist in customized Elle-pots. A portion of our cuttings are grown on for an additional year to produce a 2 year-old, 1 gallon plant for growers and retail customers.

Riverbend Orchards is proud to be a licensed propagator of 'Aurora', 'Borealis', 'Boreal Beast', 'Boreal Beauty', 'Boreal Blizzard', 'Honey Bee' and 'Tundra' haskap cultivars from the University of Saskatchewan.

Our finished plants have excellent vigour and survival and have received rave reviews from fruit growers across Canada and the northern United States.
